EDUCATION

Eidgenössische Technische Hochschule, Zürich, Switzerland *September 2019 - present*
BSc Physics

CARRIER OBJECTIVE

I want to work for an organization that provides me the opportunity to push my limits and grow along with the organization objective together with a team.

PROJECTS

Private asset allocation and portfolio analysis
In September 2020 I started my first portfolio "Alpha". Since then I document my quantatative and algorithmic analysis and describe how I allocate my assets.

Music production and DJ
In 2013 I started to create music. Since then I have produced over 40 songs, which I published on SoundCloud under my pseudonym "geeagetea". On top of that, I am a DJ with several playlists on Spotify and SoundCloud.

Fashion brand and online marketing
In 2018 I created a fashion brand called "panthera-leo". With all the Adobe products I designed different pieces of clothes, planned and succesfully launched a marketing strategy through social media, inlcuding a 30-second ad and professional photoshootings and sold just enough products to make a small profit.

TECHNICAL STRENGTHS

Modeling and Analysis	Python/PANDAS, C++
Webdesign	HTML, CSS
Software	LaTeX, Adobe products

WORK EXPERIENCE

GCA Altium, Tel Aviv, Israel June - August 2019
